HOYT'S "YARD OF PEONIES" contains the finest collection in the Northwest, a few of which are listed. The secret of good Peonies lies in having the best varieties, planted in the proper soil, with plenty of fertilizer and good cultivation. Hoyt's Peonies have these conditions, and have proven their superior quality by taking practically all of the first prizes at the Annual Peony Show, including first on best collection, and this without any artificial watering or any particular care.

The Peony is the finest of all hardy flowers and should be more liberally planted. Plant the best varieties now and be prepared for the National Peony Show, which will probably be held in the Twin Cities in the near future.

Size of Peony Plants

It always sets Peonies back some to divide them, but we are aiming to give as large a division as we can for a nominal price.

We specialize in furnishing Peonies in quantities for park and cemetery purposes. Write for prices on large quantities and state what size divisions you wish to plant.

Time for Setting Peonies

From September on is the best time for planting Peonies, as they are then almost sure to blossom the first year.

Planting

Plant in good rich soil, putting buds about three inches below the surface of the ground.

We charge 40 per cent for planting Peonies, shrubs, etc., and where clumps are selected we use the New Hoyt Peony Boxes and also add a nice lot of the finest black loam soil and well-composted fertilizer for local plantings. Plantings at the lakes or over five miles distant, 50 per cent for planting, including two-year guarantee.

Hoyt's Peonies as Cut Flowers

We are prepared to supply the finest varieties of Peony Blossoms in season for weddings, funerals, receptions and graduating exercises, in any quantity and color, at wholesale prices. Buy Hoyt's Peonies direct and get them fresh.

Hoyt's Peony Buds were shipped to California and worn by the Minnesota delegates at the National Convention of Federated Women's Clubs, lasting over a week.
